

Glitter Vase

Can be either three, four or five sides.

Cut out this shape in Pelmet Vilene or fabric, one for each side.

Use Heat Applied Glitter Film (see product for how to apply to the Pelmet Vilene or base fabric).

Stitch or embellish as you like.

If not using Heat Applied Glitter Film, cover the shape as you desire – small squares and rectangles in your choice of fabric, hand or machine stitched are very effective. Overlock or satin stitch each of the shapes – top and bottom first. Then overlock or satin stitch each shape together.

The vase will now be complete and be free standing.
